

Unleashing Nature's Potential

EASYGROW PREMIUM STATER®
Propagation Cubes (Special Blend)

www.premierhorticulture.lk

Product Code
COIR10010101

GrowGreenEcoSolutions® is aware to the fact that some growers are interested in a more mature plant for transplanting. in order to meet this demand,

GrowGreenEcoSolutions® has created a series of Coco-peat Grow Cubes (Propagation Bags) while growing in the Grow Cube the young plants roots meets the 3/4" coco-chips material which has been proved as an excellent media for root development. After placing the Eco-Grow Cubes on a growbag, the roots easily penetrate the grow bag and the plant continues its growth like it had never been moved.

GrowGreenEcoSolutions® Grow Cubes are also one of our newest inventions in the propagation product family. Using our **GrowGreenEcoSolutions®** Grow Cubes, propagators are able to propagate faster and produce healthy plants organically. Excellent water holding and equal distribution of water throughout the block ensures optimum management of the air and water balance and the equal distribution of nutrient and fertilizer solutions.

EASYGROW PREMIUM STATER® Grow Cubes are made from 100% coir fiber compressed disc packed in a biodegradable cellulosic paper. Natural coir fibers retain water and keeps roots well-aerated. The airy and fragile structure is maintained throughout the propagation cycle and until transplant into a separate growing container.

- **Excellent medium for seed propagation**
- **Fast and healthy root development**
- **Easy and fast transplant**
- **Equal water and air distribution**
- **100% biodegradable**
